

THE CONNECTED WORKPLACE

SMART OFFICE SOLUTION

Strategies to engage a distributed workforce at home, on-site, and in-transit.

Real-Time Communication

TARGETING

Targeted communications to individuals, groups, departments, and locations enhance scalable communications across a global workforce.

Notifications and alerts increase a company's ability to get employees attention and assure messages are read.

ON-THE_GO NEWS FEED

Keep employees connected with company information and workplace topics through a real-time newsfeed...where they'll never miss a beat!

The news feed contains the ability to filter news content. In today's world with a pandemic, many companies are creating a filter related to company updates and local updates.

AGGREGATED CONTENT

Source and create variable types of content that is easily consumable on-the-go whether it's blogs, thought leadership articles, videos, announcements, podcasts, or infographics etc.

All content can be sent on a local or corporate (global) level.

NOTIFICATIONS

Relevant, time-sensitive, and action-oriented in-app and OS-based notifications keep employees informed with the right message at the right time.

Notifications can be pre-programed and sent immediately. All notifications can be sent to individuals, groups, campuses or globally.

Can also be sent to employees on campus as a specific group.

BULLETIN

High priority items that are important for employees to view the next time they access the app keeps comms hyper-relevant.

Bulletin gives you the ability to send a message without alerting individuals with a pop-up OS based notification.

PODCAST PLAYER

Stories and communications are easily digestible via in-app podcast player where employees can queue up their playlist and listen at home, at their desk and everywhere in between.

EVENTS-SURVEYS-POLLS

Events, Interactive surveys and polls offer a quick and easy way to build awareness, gauge employee feedback, opinions, and keep them entertained so you can continually refine your workplace initiatives.

Employees stay up to date on campus buzz and plan for upcoming events and engagement opportunities that are part of your work culture.

Active Monitoring Initiatives

REAL-TIME CAMPUS INFORMATION

High level campus information is easily accessible on-demand with access to key areas and hot spots across your campus.

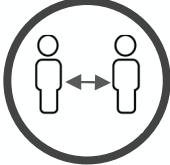

The CXApp Campus App gives employees real-time information on capacity limits by campus, by building, and by floor.

HEALTH QUESTIONNAIRE

Requirements to have each employee complete a health status questionnaire to keep workforce safety and on-site wellness top of mind.

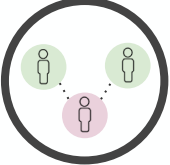

When employees arrive on campus they will receive a notification allowing them to submit their health questionnaires directly into The CXApp Smart Campus App

PHYSICAL DISTANCING

With The CXApp companies can deploy automated contact tracing that allows HR and other important departments to identify locations that have been contaminated so they can inform employees that had contact with that space or other people within that space.

Minimizes health-related issues in the workplace.

CONTACT TRACING

Companies can deploy automated contact tracing with peer-to-peer technology built into The CXApp Smart Campus app.

Allows HR and other important departments to identify office locations and employees that may have been contaminated.

DENSITY MONITORING

Strategically placed sensors around the workplace, focused in high traffic areas, provides actionable insights to make safe and intelligent resource and allocation decisions.

Real-time mobile app alerts and notifications can be sent to employees.

LIVE MAPS

State-of-the-art location services enable wayfinding capabilities that make key campus destinations easier to navigate with turn by turn directions.

Live maps are an efficient way to keep employees informed and aware of their current surroundings and to direct the flow of traffic, especially in an emergency.

CLEANING MAINTENANCE REQUESTS

Streamlined tools for room cleaning/sanitation within the work environment via a ticketing system give employees the ability to request and monitor cleaning or service needs directly from The CXApp Smart Campus App.

Enhancing A 'Low-Touch' Work Environment

BOOK A DESK

Desk booking and hoteling are used to control capacity limits by floor, building and campus.

Since each campus has it's own capacity threshold, having this functionality directly in the campus app is ideal to manage from one central system where all employees have access.

Employees can view real-time capacity numbers directly in the app.

CONFERENCE ROOMS

Booking conference rooms directly in the campus app makes it convenient and easy.

This feature eliminates the need for employees to touch a shared scheduling screen outside of each conference room.

BEACON BOOKING

Booking conference rooms with proximity beacons.

Employees can book conference rooms by walking into a conference room. The CXApp Campus App will detect a beacon in the room and pop a message on their phone, asking them if they would like to book that conference room.

NFC BOOKING

Booking conference rooms and desks with NFC stickers.

Employees can book conference rooms and desks by holding their phone 2 inches from a CXApp 'Book It!' NFC sticker.

Each NFC sticker can be programed to a conference room or desk.

ACTIVATE YOUR ROOM

Activate your conference room directly from The CXApp Smart Campus app utilizing conference room relay.

With a proximity beacon, employee access is recognized in the conference room and can activate the room hardware to begin their meeting all directly from the campus app.

DIGITAL BADGES

Digital badges can be setup in the CXApp Smart Campus App.

The app respond to access controls at various doorways/access points for no-touch entry and also used as a way to exchange information with a fellow employee or approved visitor.

FOOD ORDERING

Mobile food services can provide an order-and-pick-up option while supplying individual menu information including pictures, pricing, and nutritional information to employees seamlessly through the CXApp Smart Campus App
